“Our Bay - Our Responsibility” is an opportunity to learn about the bay’s critical watersheds and why they are important to our everyday lives, from providing the water we drink to protecting the streams we fish and enjoy. The event will also be an opportunity to meet and network with other people interested in watershed management. Children and adults throughout this region will learn the tremendous value the Bay brings to our economy, our environment and our quality of life. The Bay provides educational opportunities for children and adults to explore the Bay, fostering an understanding and a sense of personal responsibility for the resource.
